Teachers Weekly Update

Friday 13th November 2026

Next week...

The Kites did fantastically with assessment week! Regular learning commences next week: decimal fractions but in the context of weight, measurement, time and money! We'll be recapping our long division before moving onto a fractions unit. In science we'll be creating our own switches for our electrical circuits, year 6 will also investigate the effect multiple components has on performance. History will have us investigating the site of Sutton Hoo and we'll be looking at the evidence to find out about Anglo-Saxon life. CCWC will also be providing the learning through collective worships with the theme of Anti-Bullying week!

Stars of the week

Y4 Henry – This is for your thirst for knowledge and your response to feedback in your learning. Your confidence is growing by the day and it's all down to your attitude!

Y5 Matilda W – Cool, calm and collected. Your approach to learning, particularly assessments, puts you at such an advantage. You calmly navigate challenge with logic and always stay so calm!

Y6 Millie S – for everything. Your work outside of school. Your quest for perfection. The responsibility you've taken. The confidence you're showing. The attitude to everything you're asked to do is just outstanding.

Recommended Read

This beautiful text is a longer picture book, and feels more like a large-format chapter book with full-page illustrations, drawing Key Stage 2 readers into a brilliant illustrated adventure with science themes of light, design, discovery and invention. The story follows a young mouse, Pete, on a quest to uncover the mystery of his ancestor's lost treasure, a journey that unexpectedly leads him and an old Professor into the fascinating world of submarine design and the history of invention.
